### **Kratek opis**

Flat suction cup, oval, Material NBR, »SGO«, Ø30x10  
suitable connection nipple IT G 1/8, suitable connection  
nipple ET G 1/8

Robust and hard-wearing suction pad with a single, oval-  
shaped sealing lip.

Used wherever objects (parts, packing materials, etc.) need  
to be lifted, transported, turned over or handled in some  
other manner. It is also ideal when it is necessary to handle  
long or flat workpieces. Due to its oval shape, it has a  
considerably higher suction force than round, flat suction  
pads when handling narrow or long workpieces.

It acts as the connecting element between the vacuum  
generator and the workpiece.

Properties:

- Higher suction force for narrow workpieces
- Supports on the bottom
- High suction force in spite of small dimensions

Applications:

- Handling narrow workpieces and strips
- Handling workpieces with only a small, narrow gripping  
surface
